

State Primacy Agency Acknowledgement Form 2009- 2011 SE-TAC Proposals

Applicants are strongly encouraged to obtain guidance from their state primacy agency(s) to ensure that their proposal addresses priority state small public water system issues. This required form is intended to document an applicant's discussions regarding the general relevance of the proposed project to the state's needs and issues. This form does not imply endorsement of a project's merits and/or potential for success. The applicant's proposal must include this form. Applicants may also request their primacy agency write a letter of support. If you are unsure of your state's primacy agency, please refer to <http://www.epa.gov/safewater/index.html>

1. Does the proposed project target small public water systems as defined in SE-TAC's RFP?
[For purposes of this RFP, Small Public Water Systems are generally systems that provide water for human consumption to populations less than 10,000. Projects are especially encouraged to assist small systems that serve populations fewer than 3,300. Small systems also explicitly include Community Water Systems (CWS); Non-Transient Non-Community Water Systems (NTNCWS); and Transient Non-Community Water Systems (TNCWS).]
2. Does the proposed project duplicate an existing federal or state program?
3. Does the project address a unique small public water system need in the state?
4. Other Comments:

State Primacy Agency: _____

Name/Title of agency representative: _____
