

RURAL WATER ASSOCIATION CIRCUIT RIDER PROGRAM

Thad Shows
Griner Drilling Service
Columbia, Mississippi

ABSTRACT

The Mississippi Rural Water Association sponsors a program for helping rural water systems and small towns manager their water and operate their systems more efficiently. The association actively employes a program manager and a circuit rider to present seminars, training sessions, and personal help concerning water management. The circuit rider program offers training in seminars and training sessions and a direct one on one program of effective and efficient water management and know-how to rural Mississippians.

The program utilizes the expertise of professionals on water related subjects in seminars and training sessions across the State. The programs are varied and presented at various time frames to accommodate the needs of the water associations of Mississippi.

The program is funded by both federal funds (Farmers Home and EPA) and local funds.

Mr. Shows is a National Rural Water Association Director and a member of the Mississippi Rural Water Association Executive Board. For information concerning the Circuit Rider Program, contact him at
