

Lunch Panel Discussion: Regional and National Collaborations Advance Water Science

Martin A. Locke

Director

USDA-ARS National Sedimentation Laboratory

Martin Locke is Director of the USDA-Agricultural Research Service's National Sedimentation Laboratory (NSL), Oxford, Mississippi. He has been with USDA ARS since 1987, beginning his ARS career in Stoneville, MS, as a post-doctoral research associate. Dr. Locke received a B.S. from Missouri State University, an M.S. from the University of Missouri-Columbia, and a Ph.D. from Texas A & M University. He is internationally recognized as an authority on processes and factors determining the effectiveness of conservation management in protecting and enhancing soil and water resources. Dr. Locke has authored over 190 peer-reviewed publications. He provides leadership at international, national, state, and local levels. In addition to his work for the USDA-ARS, he is active in the Soil Science Society of America and American Society of Agronomy and is a Fellow of the American Society of Agronomy, Soil Science Society of America, and the Weed Science Society of America. Dr. Locke has many invitations to present his research at national and international conferences. He holds adjunct faculty positions at Mississippi State University and The University of Mississippi.
